

# GUARDIAN ANGEL

*Harbingers of utter annihilation were they, the silent, grim guardians from outer space, hanging implacably over the panic-stricken cities of Earth. . . . And only one man dared to ask the question for a million souls— What new cosmic pattern of terror had the New Masters fashioned from their heartless knowledge, that they themselves dared not reveal—until the hour of Doom?*

By  
Arthur C.  
Clarke

**P**IETER VAN RYBERG shivered, as he always did, when he came into Stormgren's room. He looked at the thermostat and shrugged his shoulders in mock resignation.

"You know, Chief," he said, "although we'll be sorry to lose you, it's nice to feel that the pneumonia death-rate will soon be falling."

"How do you know?" smiled Stormgren. "The next Secretary-General may be an Eskimo. The fuss-some people make over a few degrees centigrade!"

Van Ryberg laughed and walked over to the curving double window. He stood in silence for a moment, staring along the avenue of great white buildings, still only partly finished.

"Well," he said, with a sudden change of tone, "are you going to see them?"

Overnight, Earth had become a protectorate in some shadowy, star-strewn empire beyond the knowledge of Man. . . .

"Yes, I think so. It usually saves trouble in the long run."

Van Ryberg suddenly stiffened and pressed his face against the glass.

"Here they are!" he said. "They're coming up Wilson Avenue. Not as many as I expected, though—about two thousand, I'd say."

Stormgren walked over to the Assistant-Secretary's side. Half a mile away, a small but determined crowd carried banners along the avenue towards Headquarters Building. Presently he could hear, even through the insulation, the ominous sound of chanting voices. He felt a sudden wave

of disgust sweep over him. Surely the world had had enough of marching mobs and angry slogans!

The crowd had now come abreast of the building: it must know that he was watching, for here and there fists were being shaken in the air. They were not defying him, though the gesture was meant for him to see. As pygmies may threaten a giant, those angry fists were directed against the sky some fifty miles above his head.

And as likely as not, thought Stormgren, Karellen was looking down at the whole thing and enjoying himself hugely.

This was the first time that Stormgren had ever met the head of the Freedom League. He still wondered if the action was wise: in the final analysis he had only taken it because the League would employ any refusal as ammunition against him. He knew that the gulf was far too wide for any agreement to come from this meeting.

Alexander Wainwright was a tall but slightly stooping man in the late fifties. He seemed inclined to apologize for his more boisterous followers, and Stormgren was rather taken aback by his obvious sincerity and also by his considerable personal charm.

"I suppose," Stormgren began, "the chief object of your visit is to register a formal protest against the Federation Scheme. Am I correct?"

"That is my main purpose, Mr. Secretary. As you know, for the last five years we have tried to awaken the human race to the danger that confronts it. I must admit that, from our point of view, the response has been disappointing. The great majority of people seem content to let the Overlords run the world as they please. But this European Federation is as intolerable as it will be unworkable. Even Karellen can't wipe out two thousand years of the world's history at the stroke of a pen."

"Then do you consider," interjected Stormgren, "that Europe, and the whole world, must continue indefinitely to be divided into scores of sovereign states, each with its own currency, armed forces, customs, frontiers, and all the rest of that—that medieval paraphernalia?"

"I don't quarrel with Federation as an ultimate objective, though some of my supporters might not agree. My point is that it must come from within, not be superimposed from without. We must work out our own destiny—we have a right to

independence. There must be no more interference in human affairs!"

Stormgren sighed. All this he had heard a hundred times before, and he knew that he could only give the old answers that the Freedom League had refused to accept. He had faith in Karellen, and they had not. That was the fundamental difference, and there was nothing he could do about it. Luckily, there was nothing that the Freedom League could do either.

"Let me ask you a few questions," he said. "Can you deny that the Overlords have brought security, peace and prosperity to the world?"

"That is true. But they have taken our freedom. Man does not live—"

"By bread alone. Yes, I know—but this is the first age in which every man was sure of getting even that. In any case, what freedom have we lost compared with that which the Overlords have given us for the first time in human history?"

"Freedom to control our own lives, under God's guidance."

Stormgren shook his head.

"Last month, five hundred bishops, cardinals and rabbis signed a joint declaration pledging support for the Supervisor's policy. The world's religions are against you."

"Because so few people realize the danger. When they do, it may be too late. Humanity will have lost its initiative and will have become a subject race."

Stormgren did not seem to hear. He was watching the crowd below, milling aimlessly, now that it had lost its leader. How long, he wondered, would it be before men ceased to abandon their reason and identity when more than a few of them were gathered together? Wainwright might be a sincere and honest man, but the same could not be said of many of his followers.

Stormgren turned back to his visitor.

"In three days I shall be meeting the Supervisor again. I shall explain your objections to him, since it is my duty to represent the views of the world. But it will alter nothing."

Rather slowly, Wainwright began again.

"That brings me to another point. One of our main objections to the Overlords, as you know, is their secretiveness. You are the only human being who has ever spoken with Karellen—and even you have never seen him. Is it surprising that many of us are suspicious of his motives?"

"You have heard his speeches. Aren't they convincing enough?"

"Frankly, words are not sufficient. I do not know which we resent more—Karellen's omnipotence, or his secrecy."

Stormgren was silent. There was nothing he could say to this—nothing, at any rate, that would convince the other. He sometimes wondered if he had really convinced himself.

IT WAS, of course, only a very small operation from their point of view, but to Earth it was the biggest thing that had ever happened. There had been no warning, but a sudden shadow had fallen across a score of the world's greatest cities. Looking up from their work, a million men saw in that heart-freezing instant that the human race was no longer alone.

The twenty great ships were unmistakable symbols of a science Man could not hope to match for centuries. For seven days they floated motionless above his cities, giving no hint that they knew of his existence. But none was needed—not by chance alone could those mighty ships have come to rest so precisely over New York, London, Moscow, Canberra, Rome, Capetown, Tokyo. . . .

Even before the ending of those unforgettable days, some men had guessed the truth. This was not a first tentative contact by a race which knew nothing of Man. Within those silent, unmoving ships, master psychologists were studying humanity's reactions. When the curve of tension had reached its peak, they would reveal themselves.

And on the eighth day, Karellen, Supervisor for Earth, made himself known to the world; in perfect English. But the content of the speech was more staggering even than its delivery. By any standards, it was a work of superlative genius, showing a complete and absolute mastery of human affairs.

There was little doubt but that its scholarship and virtuosity, its tantalizing glimpses of knowledge still untapped, were deliberately designed to convince Mankind that it was in the presence of overwhelming intellectual power. When Karellen had finished, the nations of Earth knew that their days of precarious sovereignty were ending. Local, internal governments would still retain their powers, but in the wider field of international affairs the supreme decisions had passed out of human hands. Arguments, protests—all were futile. No weapon could touch those brooding giants, and even if it could, their downfall would utterly destroy the cities beneath. Overnight,

Earth had become a protectorate in some shadowy, star-strewn empire beyond the knowledge of Man.

In a little while the tumult had subsided, and the world went about its business again. The only change a suddenly awakened Rip Van Winkle would have noticed was a hushed expectancy, a mental glancing-over-the-shoulder, as Mankind waited for the Overlords to show themselves and to step down from their gleaming ships. Five years later, it was still waiting.

\* \* \*

The room was small and, save for the single chair and the table beneath the vision-screen, unfurnished. As was intended, it told nothing of the creatures who had built it. There was only the one entrance, and that led directly to the airlock in the curving flank of the great ship. Through that lock only Stormgren, alone of living men, had ever come to meet Karellen, Supervisor for Earth.

The vision screen was empty now, as it had always been. Behind that rectangle of darkness lay utter mystery—but there too lay affection and an immense and tolerant understanding of mankind. An understanding which, Stormgren knew, could only have been acquired through centuries of study.

From the hidden grille came that calm, never-hurried voice with its undercurrent of humour—the voice which Stormgren knew so well though the world had heard it only thrice in history.

"Yes, Rikki, I was listening. What did you make of Mr. Wainwright?"

"He's an honest man, whatever his supporters may be. What are we going to do about him? The League itself isn't dangerous, but some of its more extreme supporters are openly advocating violence. I've been wondering for some time if I should put a guard on my house. But I hope it isn't necessary."

Karellen evaded the point in the annoying way he sometimes had.

"The details of the European Federation have been out for a month now. Has there been a substantial increase in the seven percent who disapprove of me, or the nine percent who Don't Know?"

"Not yet, despite the press reactions. What I'm worried about is a general feeling, even among your supporters, that it's time this secrecy came to an end."

Karellen's sigh was technically perfect, yet somehow lacked conviction.

"That's your feeling, too, isn't it?"

The question was so rhetorical that Stormgren didn't bother to answer it.

"Do you really appreciate," he continued earnestly, "how difficult this state of affairs makes my job?"

"It doesn't exactly help mine," replied Karellen with some spirit. "I wish people would stop thinking of me as a world dictator and remember that I'm only a civil servant trying to administer a somewhat idealistic colonial policy."

"Then can't you at least give us some reason for your concealment? Because we don't understand it; it annoys us and gives rise to all sorts of rumors."

Karellen gave that deep, rich laugh of his, just too musical to be altogether human.

"What am I supposed to be now? Does the robot theory still hold the field? I'd rather be a mass of cogwheels than crawl around the floor like a centipede, as some of the tabloids seem to imagine."

Stormgren let out a Finnish oath he was fairly sure Karellen wouldn't know—though one could never be quite certain in these matters.

"Can't you ever be serious?"

"My dear Rikki," said Karellen, "it's only by not taking the human race seriously that I retain those fragments of my once considerable mental powers that I still possess."

Despite himself, Stormgren smiled.

"That doesn't help me a great deal, does it? I have to go down there and convince my fellow men that although you won't show yourself, you've got nothing to hide. It's not an easy job. Curiosity is one of the most dominant human characteristics. You can't defy it forever."

"Of all the problems that faced us when we came to Earth, this was the most difficult," admitted Karellen. "You have trusted our wisdom in other things—surely you can trust us in this!"

"I trust you," said Stormgren, "but Wainwright doesn't, nor do his supporters. Can you really blame them if they put a bad interpretation upon your unwillingness to show yourself?"

"Listen, Rikki," Karellen answered at length. "These matters are beyond my control. Believe me, I regret the need for this concealment, but the reasons are sufficient. However, I will try to get a statement from my superior which may satisfy you and perhaps placate the Freedom League. Now, please, can we return to the agenda and start recording again?"

We've only reached Item 23, and I want to make a better job of settling the middle question than my predecessors for the last few thousand years . . . ."

"ANY luck, Chief?" asked van Ryberg anxiously.

"I don't know," Stormgren replied wearily as he threw the files down on his desk and collapsed into the seat. "Karellen's consulting his superior now, whoever or whatever he may be. He won't make any promises."

"Listen," said Pieter abruptly. "I've just thought of something. What reason have we for believing that there is anyone beyond Karellen? The Overlords may be a myth—you know how he hates the word."

Tired though he was, Stormgren sat up with a start.

"It's an ingenious theory. But it clashes with what little I do know about Karellen's background."

"And how much is that?"

"Well, he was a professor of astropolitics on a world he calls Skyrondel, and he put up a terrific fight before they made him take this job. He pretends to hate it, but he's really enjoying himself."

Stormgren paused for a moment, and a smile of amusement softened his rugged features.

"At any rate, he once remarked that running a private zoo is rather good fun."

"H'm-m—a somewhat dubious compliment. He's immortal, isn't he?"

"Yes, after a fashion, though there's something thousands of years ahead of him which he seems to fear: I can't imagine what it is. And that's really all I know."

"He could easily have made it up. My theory is that his little fleet's lost in space and looking for a new home. He doesn't want us to know how few he and his comrades are. Perhaps all those other ships are automatic, and there's no one in any of them. They're just an imposing facade."

"You," said Stormgren with great severity, "have been reading science-fiction in office hours."

Van Ryberg grinned.

"The 'Invasion from Space' didn't turn out quite as expected, did it? My theory would certainly explain why Karellen never shows himself. He doesn't want us to learn that there are no Overlords."

Stormgren shook his head in amused disagreement.

"Your explanation, as usual, is much too ingenious to be true. Though we can only

infer its existence, there must be a great civilization behind the Supervisor—and one that's known about Man for a very long time. Karellen himself must have been studying us for centuries. Look at his command of English, for example. He taught me how to speak it idiomatically!"

"I sometimes think he went a little too far," laughed van Ryberg. "Have you ever discovered anything he *doesn't* know?"

"Oh, yes, quite often—but only on trivial points. Yet, taken one at a time, I don't think his mental gifts are quite outside the range of human achievement. But no man could possibly do all the things he does."

"That's more or less what I'd decided already," agreed van Ryberg. "We can argue around Karellen forever, but in the end we always come back to the same question—why the devil won't he show himself? Until he does, I'll go on theorizing and the Freedom League will go on fulminating."

He cocked a rebellious eye at the ceiling.

"One dark night, Mr. Supervisor, I'm going to take a rocket up to your ship and climb in through the back door with my camera. What a scoop *that* would be!"

If Karellen was listening, he gave no sign of it. But, of course, he never did give any sign.

\* \* \*

It was completely dark when Stormgren awoke. How strange that was, he was for a moment too sleepy to realize. Then, as full consciousness dawned, he sat up with a start and felt for the light-switch beside his bed.

In the darkness his hand encountered a bare stone wall, cold to the touch. He froze instantly, mind and body paralyzed by the impact of the unexpected. Then, scarcely believing his senses, he kneeled on the bed and began to explore with his finger tips that shockingly unfamiliar wall.

He had been doing this for only a moment when there was a sudden 'click' and a section of the darkness slid aside. He caught a glimpse of a man silhouetted against a dimly lit background: then the door closed again and the darkness returned. It happened so swiftly that he saw nothing of the room in which he was lying.

An instant later, he was dazzled by the light of a powerful electric torch. The beam flickered across his face, held him steadily for a moment, then dipped to il-

luminate the whole bed—which was, he now saw, nothing more than a mattress supported on rough planks.

Out of the darkness a soft voice spoke to him in excellent English but with an accent which at first Stormgren could not identify.

"Ah, Mr. Secretary, I'm glad to see you're awake. I hope you feel all right."

The angry questions he was about to ask died upon his lips. He stared back into the darkness, then replied calmly, "How long have I been unconscious?"

"Several days. We were promised that there would be no after-effects. I'm glad to see it's true."

Partly to gain time, partly to test his own reactions, Stormgren swung his legs over the side of the bed. He was still wearing his night-clothes, but they were badly crumpled and seemed to have gathered considerable dirt. As he moved he felt a slight dizziness—not enough to be troublesome, but sufficient to convince him that he had indeed been drugged.

The oval of light slipped across the room and for the first time Stormgren had an idea of its dimensions. He realized that he was underground, possibly at a great depth. If he had been unconscious for several days he might be anywhere on Earth.

The torch-light illuminated a pile of clothes draped over a packing case.

"This should be enough for you," said the voice from the darkness. "Laundry's rather a problem here, so we grabbed a couple of your suits and half a dozen shirts."

"That," said Stormgren without humor, "was considerate of you."

"We're sorry about the absence of furniture and electric light. This place is convenient in some ways, but it rather lacks amenities."

"Convenient for what?" asked Stormgren as he climbed into a shirt. The feel of the familiar cloth beneath his fingers was strangely reassuring.

"Just—convenient," said the voice. "And by the way, since we're likely to spend a good deal of time together, you'd better call me Joe."

"Despite your nationality," retorted Stormgren, "I think I could pronounce your real name. It won't be worse than many Finnish ones."

There was a slight pause and the light flickered for an instant.

"Well, I should have expected it," said Joe resignedly. "You must have plenty of practice at this sort of thing."

"It's a useful hobby for a man in my position. I suppose you were born in Poland, and picked up your English in Britain during the War? I should think you were stationed quite a while in Scotland, from your r's."

"That," said the other very firmly, "is quite enough. As you seem to have finished dressing—thank you."

THE walls around them, though occasionally faced with concrete, were mostly bare rock. It was clear to Stormgren that he was in some disused mine, and he could think of few more effective prisons. Until now the thought that he had been kidnaped had somehow failed to worry him greatly. He felt that, whatever happened, the immense resources of the Supervisor would soon locate and rescue him. Now he was not so sure—there must be a limit even to Karellen's powers, and if he was indeed buried in some remote continent all the science of the Overlords might be unable to trace him.

There were three other men round the table in the bare but brightly lit room. They looked up with interest and more than a little awe as Stormgren entered. Joe was by far the most outstanding character—not merely in physical bulk. The others were nondescript individuals, probably Europeans also. He would be able to place them when he heard them talk.

"Well," he said evenly, "now perhaps you'll tell me what this is all about, and what you hope to get out of it."

Joe cleared his throat.

"I'd like to make one thing clear," he said. "This has nothing to do with Wainwright. He'll be as surprised as anyone else."

Stormgren had rather expected this. It gave him relatively little satisfaction to confirm the existence of an extremist movement inside the Freedom League.

"As a matter of interest," he said, "how did you kidnap me?"

He hardly expected a reply, and was taken aback by the other's readiness—even eagerness—to answer. Only slowly did he guess the reason.

"It was all rather like one of those old Fritz Lang films," said Joe cheerfully. "We weren't sure if Karellen had a watch on you, so we took somewhat elaborate precautions. You were knocked out by gas in the air-conditioner—that was easy. Then we carried you out into the car and drove off—no trouble at all. All this, I might say,

wasn't done by any of our people. We hired—er—professionals for the job. Karellen may get them—in fact, he's supposed to—but he'll be no wiser. When it left your house, the car drove into a long road tunnel not a thousand kilometers from New York. It came out again on schedule at the other end, still carrying a drugged man extraordinarily like the Secretary-General. About the same time a large truck loaded with metal cases emerged in the opposite direction and drove to a certain airfield where one of the cases was loaded aboard a freighter. Meanwhile the car that had done the job continued elaborate evasive action in the general direction of Canada. Perhaps Karellen's caught it by now: I don't know.

"As you'll see—I do hope you appreciate my frankness—our whole plan depended on one thing. We're pretty sure that Karellen can see and hear everything that happens on the surface of the Earth—but unless he uses magic, not science, he can't see underneath it. So he won't know about that transfer in the tunnel. Naturally we've taken a risk, but there were also one or two other stages in your removal which I won't go into now. We may have to use them again one day, and it would be a pity to give them away."

Joe had related the whole story with such obvious gusto that Stormgren found it difficult to be appropriately furious. Yet he felt very disturbed. The plan was an ingenious one, and it seemed more than likely that whatever watch Karellen kept on him, he would have been tricked by this ruse.

The Pole was watching Stormgren's reactions closely. He would have to appear confident, whatever his real feelings.

"You must be a lot of fools," said Stormgren scornfully, "if you think you can trick the Overlords like this. In any case, what conceivable good would it do?"

Joe offered him a cigarette, which Stormgren refused, then lit one himself.

"Our motives," he began, "should be pretty obvious. We've found that argument's useless, so we have to take other measures. Whatever powers he's got, Karellen won't find it easy to deal with us. We're out to fight for our independence. Don't misunderstand me. There'll be nothing violent—at first, anyway. But the Overlords have to use human agents, and we can make it mighty uncomfortable for them."

Starting with me, I suppose, thought Stormgren.

"What do you intend to do with me?" asked Stormgren at length. "Am I a hostage, or what?"

"Don't worry—we'll look after you. We expect some visitors in a day or two, and until then we'll entertain you as well as we can."

He added some words in his own language, and one of the others produced a brand-new pack of cards.

"We got these especially for you," explained Joe. His voice suddenly became grave. "I hope you've got plenty of cash," he said anxiously. "After all, we can hardly accept checks."

Quite overcome, Stormgren stared blankly at his captors. Then it suddenly seemed to him that all the cares and worries of office had lifted from his shoulders. Whatever happened, there was absolutely nothing he could do about it—and now these fantastic criminals wanted to play poker with him.

Abruptly, he threw back his head and laughed as he had not done for years.

**D**URING the next three days Stormgren analyzed his captors with some thoroughness. Joe was the only one of any importance, the others were nonentities—the riffraff one would expect any illegal movement to gather round itself.

Joe was an altogether more complex individual, though sometimes he reminded Stormgren of an overgrown baby. Their interminable poker games were punctuated with violent political arguments, but it became obvious to Stormgren that the big Pole had never thought seriously about the cause for which he was fighting. Emotion and extreme conservatism clouded all his judgments. His country's long struggle for independence had conditioned him so completely that he still lived in the past. He was a picturesque survival, one of those who had no use for an ordered way of life. When his type had vanished, if it ever did, the world would be a safer but less interesting place.

There was little doubt as far as Stormgren was concerned, that Karellen had failed to locate him. He was not surprised when, five or six days after his capture, Joe told him to expect visitors. For some time the little group had shown increasing nervousness, and the prisoner guessed that the leaders of the movement, having seen that the coast was clear, were at last coming to collect him.

They were already waiting, gathered round the rickety table, when Joe waved him politely into the living room. The

three thugs had vanished, and even Joe seemed somewhat restrained. Stormgren could see at once that he was now confronted by men of a much higher caliber. There was intellectual force, iron determination, and ruthlessness in these six men. Joe and his like were harmless—here were the real brains behind the organization.

With a curt nod, Stormgren moved over to the seat and tried to look self-possessed. As he approached, the elderly, thick-set man on the far side of the table leaned forward and stared at him with piercing gray eyes. They made Stormgren so uncomfortable that he spoke first—something he had not intended to do.

"I suppose you've come to discuss terms. What's my ransom?"

He noticed that in the background someone was taking down his words in a shorthand notebook. It was all very business-like.

The leader replied in a musical Welsh accent.

"You could put it that way, Mr. Secretary-General. But we're interested in information, not cash. You know what our motives are. Call us a resistance movement, if you like. We believe that sooner or later Earth will have to fight for its independence. We kidnaped you partly to show Karellen that we mean business and are well organized, but largely because you are the only man who can tell us anything of the Overlords. You're a reasonable man, Mr. Stormgren. Give us your co-operation, and you can have your freedom."

"Exactly what do you wish to know?" asked Stormgren cautiously.

"Do you know who, or what, the Overlords really are?"

Stormgren almost smiled.

"Believe me," he said, "I'm quite as anxious as you to discover that."

"Then you'll answer our questions?"

"I make no promises. But I may."

There was a slight sigh of relief from Joe and a rustle of anticipation went round the room.

"We have a general idea," continued the other, "of the circumstances in which you meet Karellen. Would you go through them carefully, leaving out nothing of importance?"

That was harmless enough, thought Stormgren. He had done it scores of times before, and it would give the appearance of co-operation.

He felt in his pockets and produced a pencil and an old envelope. Sketching

rapidly while he conversed, he began:

"You know, of course, that a small flying machine, with no obvious means of propulsion, calls for me at regular intervals and takes me up to Karellen's ship. There is only one small room in that machine, and it's quite bare apart from a couch and table. The layout is something like this." As Stormgren talked, it seemed to him that his mind was operating on two levels simultaneously. On the one hand he was trying to defy the men who had captured him, yet on the other he was hoping that they might help him to unravel Karellen's secret. He did not feel that he was betraying the Supervisor, for there was nothing here that he had not told many times before. Moreover, the thought that these men could harm Karellen in any way was fantastic.

The Welshman conducted most of the interrogation. It was fascinating to watch that agile mind trying one opening after another, testing and rejecting all the theories that Stormgren himself had abandoned long ago. Presently he leaned back with a sigh and the shorthand writer laid down his stylus.

"We're getting nowhere," he said resignedly. "We want more facts, and that means action—not argument." The piercing eyes stared thoughtfully at Stormgren. For a moment he tapped nervously on the table—the first sign of uncertainty that Stormgren had noticed. Then he continued:

"I'm a little surprised, Mr. Secretary, that you've never made an effort to learn more about the Overlords."

"What do you suggest?" asked Stormgren coldly. "I've told you that there's only one way out of the room in which I've had my talks with Karellen—and that leads straight to the airlock."

"It might be possible," mused the other, "to devise instruments which could teach us something. I'm no scientist, but we can look into the matter. If we give you your freedom, would you be willing to assist with such a plan?"

"Once and for all," said Stormgren angrily, "let me make my position perfectly clear. Karellen is working for a united world, and I'll do nothing to help his enemies. What his ultimate plans may be, I don't know, but I believe that they are good. You may annoy him, you may even delay the achievement of his aims, but it will make no difference in the end. You may be sincere in believing as you do: I can understand your fear that the tradi-

tions and cultures of little countries will be overwhelmed when the World State arrives. But you are wrong: it is useless to cling to the past. Even before the Overlords came to Earth, the sovereign state was dying. No one can save it now, and no one should try."

There was no reply: the man opposite neither moved nor spoke. He sat with lips half open, his eyes now lifeless and blind. Around him the others were equally motionless, frozen in strained, unnatural attitudes. With a little gasp of pure horror, Stormgren rose to his feet and backed away toward the door. As he did so the silence was suddenly broken.

"That was a nice speech, Rikki. Now I think we can go."

"Karellen! Thank God—but what have you done?"

"Don't worry. They're all right. You can call it a paralysis, but it's much subtler than that. They're simply living a few thousand times more slowly than normal. When we're gone, they'll never know what happened."

"You'll leave them here until the police come?"

"No: I've a much better plan. I'm letting them go."

STORMGREN felt an illogical sense of relief which he did not care to analyze. He gave a last valedictory glance at the little room and its frozen occupants. Joe was standing on one foot, staring very stupidly at nothing. Suddenly Stormgren laughed and fumbled in his pockets.

"Thanks for the hospitality, Joe," he said. "I think I'll leave a souvenir."

On a reasonably clean sheet of paper he wrote carefully:

#### BANK OF MANHATTAN

Pay "Joe" the sum of Fifteen Dollars  
Thirty-five Cents (\$15.35).

R. Stormgren.

As he laid the strip of paper beside the Pole, Karellen's voice inquired: "Exactly what are you up to?"

"Paying a debt of honor," explained Stormgren. "The other two cheated, but I think Joe played fair."

He felt very gay and light-headed as he walked to the door. Hanging just outside it was a large, featureless metal sphere that moved aside to let him pass. He guessed that it was some kind of robot, and it explained how Karellen had been able to reach him through the unknown layers of rock overhead.

D.K. 49

"You've half a mile to go," said the sphere.

"Carry on for a hundred yards," said the sphere, speaking in Karellen's voice. "Then turn to the left until I give you further instructions."

He ran forward eagerly, though he realized that there was no need for hurry. The sphere remained hanging in the corridor, and Stormgren guessed that it was the generator of the paralysis field.

A minute later he came across a second sphere, waiting for him at a fork in the corridor.

"You've half a mile to go," it said. "Keep to the left until we meet again."

Six times he encountered the spheres on his way to the open. At first he wondered if somehow the first robot had

slipped ahead of him; then he guessed that there must be a chain of them maintaining a complete circuit down into the depths of the mine. At the entrance a group of guards formed a piece of improbable still life, watched over by yet another of the ubiquitous spheres. On the hillside a few yards away lay the little flying machine in which Stormgren had made all his journeys to Karellen.

He stood for a moment blinking in the fierce sunlight. As he climbed into the little ship, he had a last glimpse of the mine entrance and the men frozen round it. Quite suddenly a line of metal spheres raced out of the opening like silver cannon balls. Then the door closed behind him

and with a sigh of relief he sank back upon the familiar couch.

For a while Stormgren waited until he had recovered his breath, then he uttered a single, heartfelt syllable:

"Well?"

"I'm sorry I couldn't rescue you before. But you'll see how very important it was to wait until all the leaders had gathered here."

"Do you mean to say," spluttered Stormgren, "that you knew where I was all the time? If I thought—"

"Don't be so hasty," answered Karellen, "or at any rate, let me finish explaining."

"It had better be good," said Stormgren darkly. He was beginning to suspect that he had been no more than the bait in an elaborate trap.

"I've had a tracer on you for some time," began Karellen, "and though your late friends were correct in thinking that I couldn't follow you underground, I was able to keep track until they brought you to the mine. That transfer in the tunnel was ingenious, but when the first car ceased to react, it gave the show away and I soon located you again. Then it was merely a matter of waiting. I knew that once they were certain I'd lost you, the leaders would come here and I'd be able to trap them all."

"But you're letting them go!"

"Until now," said Karellen, "I did not know which of the two billion men on this planet were the heads of the organization. Now that they're located, I can trace their movements anywhere on Earth. That's far better than locking them up. They're effectively neutralized, and they know it."

That rich laugh echoed round the tiny room.

"In some ways the whole affair was a comedy, but it had a serious purpose. It will be a valuable object lesson for any other plotters."

Stormgren was silent for a while. He was not altogether satisfied, but he could see Karellen's point of view and some of his anger had evaporated.

"It's a pity to do it in my last few weeks of office," he said, "but from now on I'm going to have a guard on my house. Pieter can be kidnaped next time. How has he managed, by the way? Are things in as big a mess as I expect?"

"You'll be disappointed to find how little your absence has mattered. I've watched Pieter carefully this past week, and have deliberately avoided helping him. On the

whole he's done very well—but he's not the man to take your place."

"That's lucky for him," said Stormgren, still rather aggrieved. "And have you had any word from your superior about—about showing yourself to us? I'm sure now that it's the strongest argument your enemies have. Again and again, they told me, 'We'll never trust the Overlords until we can see them.'"

Karellen sighed.

"No, I have heard nothing. But I know what the answer must be."

Stormgren did not press the matter. Once he might have done so, but now for the first time the faint shadow of a plan had come into his mind. What he had refused to do under duress, he might yet attempt of his own free will.

**PIERRE DUVAL** showed no surprise when Stormgren walked unannounced into his office. They were old friends, and there was nothing unusual in the Secretary-General paying a personal visit to the chief of the Science Bureau. Certainly Karellen would not think it odd, even if by any remote chance he turned his attention to this corner of the world.

For a while the two men talked business and exchanged political gossip; then, rather hesitantly, Stormgren came to the point. As his visitor talked, the old Frenchman leaned back in his chair and his eyebrows rose steadily millimeter by millimeter until they were almost entangled in his forelock. Once or twice he seemed about to speak but each time thought better of it.

When Stormgren had finished, the scientist looked nervously around the room.

"Do you think he was listening?" he said.

"I don't believe he can. This place is supposed to be shielded from everything, isn't it? Karellen's not a magician. He knows where I am, but that's all."

"I hope you're right. Apart from that, won't there be trouble when he discovers what you're trying to do? Because he will, you know."

"I'll take that risk. Besides, we understand each other rather well."

The physicist toyed with his pencil and stared into space for a while.

"It's a very pretty problem. I like it," he said simply. Then he dived into a drawer and produced an enormous writing-pad, the biggest Stormgren had ever seen.

"Right," he began, scribbling furiously. "Let me make sure I have all the facts. Tell me everything you can about the

room in which you have your interviews. Don't omit any detail, however trivial it seems."

Finally the Frenchman studied his notes with puckered brow.

"And that's all you can tell me?"

"Yes."

He snorted in disgust.

"What about lighting? Do you sit in total darkness? And how about heating, ventilation . . ."

Stormgren smiled at the characteristic outburst.

"The whole ceiling is luminous, and as far as I can tell the air comes through the speaker grille. I don't know how it leaves; perhaps the stream reverses at intervals, but I haven't noticed it. There's no sign of any heaters, but the room is always at normal temperature. As for the machine that takes me up to Karellen's ship, the room in which I travel is as featureless as an elevator cage."

There was silence for several minutes while the physicist embroidered his writing-pad with meticulous and microscopic doodles. No one could have guessed that behind that still almost unfurrowed brow, the world's finest technical brain was working with the icy precision that had made it famous.

Then Duval nodded to himself in satisfaction, leaned forward and pointed his pencil at Stormgren.

"What makes you think, Rikki," he asked, "that Karellen's vision screen, as

you call it, really is what it pretends to be? Doesn't it seem far more probable that your 'vision screen' is really *nothing more complicated than a sheet of one-way glass?*"

Stormgren was so annoyed with himself that for a moment he sat in silence, re-tracing the past. From the beginning, he had never challenged Karellen's story—yet now that he came to look back, when had the Supervisor ever told him that he was using a television system? He had just taken it for granted; the whole thing had been a piece of psychological trickery, and he had been completely deceived. He tried to console himself with the thought that in the same circumstances even Duval would have fallen into the trap.

"If you're right," he said, "all I have to do is to smash the glass—"

Duval sighed.

"These non-technical laymen! Do you think it's likely to be made of anything you could smash without explosives? And if you succeeded, do you imagine that Karellen is likely to breathe the same air as we do? Won't it be nice for both of you if he flourishes in an atmosphere of chlorine?"

Stormgren turned rather pale.

"Well, what do you suggest?" he asked with some exasperation.

"I want to think it over. First of all we've got to find if my theory is correct, and if so learn something about the material of the screen. I'll put some of my best men

ON THE NEWSSTANDS

# THE MAN WHO MASTERED TIME

By Ray Cummings

Feverishly, he toiled to complete his strange quest . . . to cross the trackless plains of Time before his life span ended—and find again, along the awful reaches of that dark Unknown, the Paradise that to him alone had been revealed in one amazing burst of light. . . .

**FANTASTIC**  
Novels

on the job—by the way, I suppose you carry a brief-case when you visit the Supervisor? Is it the one you've got there?"

"Yes."

"It's rather small. Will you get one at least ten centimeters deep, and use it from now on so that he becomes used to seeing it?"

"Very well," said Stormgren doubtfully. "Do you want me to carry a concealed X-ray set?"

The physicist grinned.

"I don't know yet, but we'll think of something. I'll let you know what it is in about a month's time."

He gave a little laugh.

"Do you know what this all reminds me of?"

"Yes," said Stormgren promptly, "the time you were building illegal radio sets during the German occupation."

Duval looked disappointed.

"Well, I suppose I *have* mentioned that once or twice before."

**S**TORMGREN laid down the thick folder of typescript with a sigh of relief.

"Thank heavens that's settled at last," he said. "It's strange to think that those few hundred pages hold the future of Europe."

Stormgren dropped the file into his brief-case, the back of which was now only six inches from the dark rectangle of the screen. From time to time his fingers played across the locks in a half-conscious nervous reaction, but he had no intention of pressing the concealed switch until the meeting was over. There was a chance that something might go wrong—though Duval had sworn that Karellen would detect nothing, one could never be sure.

"Now, you said you'd some news for me," Stormgren continued, with scarcely concealed eagerness. "Is it about—"

"Yes," said Karellen. "I received the Policy Board's decision a few hours ago, and am authorized to make an important statement. I don't think that the Freedom League will be very satisfied, but it should help to reduce the tension. We won't record this, by the way.

"You've often told me, Rikki, that no matter how unlike you we are physically, the human race will soon grow accustomed to us. That shows a lack of imagination on your part. It would probably be true in your case, but you must remember that most of the world is still uneducated by any reasonable standards, and is riddled with prejudices and supersti-

tions that may take another hundred years to eradicate.

"You will grant us that we know something of human psychology. We know rather accurately what would happen if we revealed ourselves to the world in its present state of development. I can't go into details, even with you, so you must accept my analysis on trust. We can, however, make this definite promise, which should give you some satisfaction. *In fifty years—two generations from now—we shall come down from our ships and humanity will at last see us as we are.*"

Stormgren was silent for a while. He felt little of the satisfaction that Karellen's statement would have once given him. Indeed, he was somewhat confused by his partial success, and for a moment his resolution faltered. The truth would come with the passage of time, and all his plotting was unnecessary and perhaps unwise. If he still went ahead, it would only be for the selfish reason that he would not be alive fifty years from now.

Karellen must have seen his irresolution, for he continued:

"I'm sorry if this disappoints you, but at least the political problems of the near future won't be your responsibility. Perhaps you still think that our fears are unfounded, but believe me, we've had convincing proof of the dangers of any other course."

Stormgren leaned forward, breathing heavily.

"I always thought so! You *have* been seen by Man!"

"I didn't say that," Karellen answered after a short pause. "Your world isn't the only planet we've supervised."

Stormgren was not to be shaken off so easily.

"There had been many legends suggesting that Earth has been visited in the past by other races."

"I know. I've read the Historical Research Section's report. It makes Earth look like the crossroads of the Universe."

"There may have been visits about which you know nothing," said Stormgren, still angling hopefully. "Though since you must have been observing us for thousands of years, I suppose that's rather unlikely."

"I suppose it is," said Karellen in his most unhelpful manner. And at that moment Stormgren made up his mind.

"Karellen," he said abruptly, "I'll draft out the statement and send it up to you for approval. But I reserve the right to continue pestering you, and if I see any

opportunity, I'll do my best to learn your secret."

"I'm perfectly well aware of that," replied the Supervisor, with a suspicion of a chuckle.

"And you don't mind?"

"Not in the slightest—though I draw the line at atomic bombs, poison gas, or anything else that might strain our friendship."

Stormgren wondered what, if anything, Karellen had guessed. Behind the Supervisor's banter he had recognized the note of understanding, perhaps—who could tell?—even of encouragement.

"I'm glad to know it," Stormgren replied in as level a voice as he could manage. He rose to his feet, bringing down the cover of his case as he did so. His thumb slid along the catch.

"I'll draft that statement at once," he repeated, "and send it up on the teletype later today."

While he was speaking, he pressed the button—and knew that all his fears had been groundless. Karellen's senses were no finer than Man's. The Supervisor could have detected nothing, for there was no change in his voice as he said good-by and spoke the familiar code-words that opened the door of the chamber.

Yet Stormgren still felt like a shoplifter leaving a department store under the eyes of the house detective, and breathed a sigh of relief when the airlock doors had finally closed behind him.

"I ADMIT," said van Ryberg, "that some of my theories haven't been very bright. But tell me what you think of this one."

"Must I?"

Pieter didn't seem to notice.

"It isn't really my idea," he said modestly. "I got it from a story of Chesterton's. Suppose that the Overlords are hiding the fact that they've got nothing to hide?"

"That sounds a little complicated to me," said Stormgren, interestedly.

"What I mean is this," van Ryberg continued eagerly. "I think that physically they're human beings like us. They realize that we'll tolerate being ruled by creatures we imagine to be—well, alien and superintelligent. But the human race being what it is, it just won't be bossed around by creatures of the same species."

"Very ingenious, like all your theories," said Stormgren. "I wish you'd give them Opus numbers so that I could keep up with them. The objections to this one—"

But at that moment Alexander Wainwright was ushered in.

Stormgren wondered what he was thinking. He wondered, too, if Wainwright had made any contact with the men who had kidnaped him. He doubted it, for he believed Wainwright's disapproval of violent methods to be perfectly genuine. The extremists in his movement had discredited themselves thoroughly, and it would be a long time before the world heard of them again.

The head of the Freedom League listened in silence while the draft was read to him. Stormgren hoped that he appreciated this gesture, which had been Karellen's idea. Not for another twelve hours would the rest of the world know of the promise that had been made to its grandchildren.

"Fifty years," said Wainwright thoughtfully. "That is a long time to wait."

"Not for Karellen, nor for humanity," Stormgren answered. Only now was he beginning to realize the neatness of the Overlords' solution. It had given them the breathing space they believed they needed, and it had cut the ground from beneath the Freedom League's feet. He did not imagine that the League would capitulate, but its position would be seriously weakened.

Certainly Wainwright realized this as well, as he must also have realized that Karellen would be watching him. For he said very little and left as quickly as he could; Stormgren knew that he would not see him again in his term of office. The Freedom League might still be a nuisance, but that was a problem for his successor.

There were some things that only time could cure. Evil men could be destroyed, but nothing could be done about good men who were deluded.

\* \* \*

"Here's your case," said Duval. "It's as good as new."

"Thanks," Stormgren answered, inspecting it carefully none the less. "Now perhaps you can tell me what it was all about—and what we are going to do next."

The physicist seemed more interested in his own thoughts.

"What I can't understand," he said, "is the ease with which we've got away with it. Now if I'd been Kar—"

"But you're not. Get to the point, man. What *did* we discover?"

Duval pushed forward a photographic record which to Stormgren looked rather like the autograph of a mild earthquake.

"See that little kink?"

"Yes. What is it?"

"Only Karellen."

"Good Lord! Are you sure?"

"It's a pretty safe guess. He's sitting, or standing, or whatever he does, about two meters on the other side of the screen. If the resolution had been better, we might even have calculated his size."

Stormgren's feelings were very mixed as he stared at the scarcely visible deflexion of the trace. Until now, there had

been no proof that Karellen even had a material body. The evidence was still indirect, but he accepted it with little question.

Duval's voice cut into his reverie.

"You'll realize," he said, "that there's no such thing as a truly one-way glass. Karellen's screen, we found when we analyzed our results, transmits light about a hundred times as easily in one direction as the other." With the air of a conjuror producing a whole litter of rabbits, he reached into his desk and pulled out a pistol-like object with a flexible bell-mouth. It reminded Stormgren of a rubber blunderbuss, and he couldn't imagine what it was supposed to be.

Duval grinned at his perplexity.

"It isn't as dangerous as it looks. All you have to do is to ram the muzzle against the screen and press the trigger. It gives out a very powerful flash lasting five seconds, and in that time you'll be able to swing it around the room. Enough light will come back to give you a good view."

"It won't hurt Karellen?"

"Not if you aim low and sweep it upward. That will give him time to accommodate—I suppose he has reflexes like ours, and we don't want to blind him."

Stormgren looked at the weapon doubtfully and hefted it in his hand. For the last few weeks his conscience had been pricking him. Karellen had always treated him with unmistakable affection, despite his occasional devastating frankness, and now that their time together was drawing to its close he did not wish to do anything that might spoil that relationship. But the Supervisor had received due warning, and Stormgren had the conviction that if the choice had been his, Karellen would long ago have shown himself. Now the decision would be made for him—when their last meeting came to its end, Stormgren would gaze upon Karellen's face.

If, of course, Karellen had a face.

\* \* \*

The nervousness that Stormgren had first felt had long since passed away. Karellen was doing almost all the talking, weaving the long, intricate sentences of which he was so fond. Once this had seemed to Stormgren the most wonderful and certainly the most unexpected of all Karellen's gifts. Now it no longer appeared quite so marvelous, for he knew that like most of the Supervisor's abilities it was the result of sheer intellectual power and not of any special talent.

(Continued on page 127)

## GUARDIAN ANGEL

(Continued from page 112)

Karellen had time for any amount of literary composition when he slowed his thoughts down to the pace of human speech.

"Do not worry," he said, "about the Freedom League. It has been very quiet for the past month, and though it will revive again, it is no longer a real danger. Indeed, since it's always valuable to know what your opponents are doing, the League is a very useful institution. Should it ever get into financial difficulties I might even subsidize it."

Stormgren had often found it difficult to tell when Karellen was joking. He kept his face impassive.

"Very soon the League will lose another of its strongest arguments. There's been a good deal of criticism, mostly rather childish, of the special position you have held for the past few years. I found it very valuable in the early days of my administration, but now that the world is moving along the lines that I planned, it can cease. In the future, all my dealings with Earth will be indirect and the office of Secretary-General can once again become what it was originally intended to be.

"During the next fifty years there will be many crises, but they will pass. Almost a generation from now, I shall reach the nadir of my popularity, for plans must be put into operation which cannot be fully explained at the time. Attempts may even be made to destroy me. But the pattern of the future is clear enough, and one day all these difficulties will be forgotten—even to a race with memories as long as yours."

THE last words were spoken with such a peculiar emphasis that Stormgren immediately froze in his seat. Karellen never made accidental slips and even his indiscretions were calculated to many decimal places. But there was no time to ask questions—which certainly would not be answered—before the Supervisor had changed the subject again.

"You've often asked me about our long-term plans," he continued. "The foundation of the World State is of course only the first step. You will live to see its completion—but the change will be so imperceptible that few will notice it when it comes. After that there will be a pause for thirty years while the next generation reaches maturity. And then will come the

# FAMOUS FANTASTIC MYSTERIES

day which we have promised. I am sorry that you will not be there."

Stormgren's eyes were open, but his gaze was fixed far beyond the dark barrier of the screen. He was looking into the future, imagining the day he would never see.

"On that day," continued Karellen, "the human mind will experience one of its very rare psychological discontinuities. But no permanent harm will be done—the men of that age will be more stable than their grandfathers. We will always have been part of their lives, and when they meet us, we will not seem so—strange—as we would do to you."

Stormgren had never known Karellen in so contemplative a mood, but this gave him no surprise. He did not believe that he had ever seen more than a few facets of the Supervisor's personality—the real Karellen was unknown and perhaps unknowable to human beings. And once again Stormgren had the feeling that the Supervisor's real interests were elsewhere.

"Then there will be another pause, only a short one this time, for the world will be growing impatient. Men will wish to go out to the stars, to see the other worlds of the Universe and to join us in our work. For it is only beginning—not a thousandth of the suns in the Galaxy have ever been visited by the races of which we know. One day, Rikki, your descendants in their own ships will be bringing civilization to the worlds that are ripe to receive it—just as we are doing now."

Karellen had fallen silent and Stormgren had the impression that the Supervisor was watching him intently.

"It is a great vision," he said softly. "Do you bring it to all your worlds?"

"Yes," said Karellen, "all that can understand it."

Out of nowhere, a strangely disturbing thought came into Stormgren's mind.

"Suppose, after all, your experiment fails with Man? We have known such things in our own dealings with other races. Surely you have had your failures too?"

"Yes," said Karellen, so softly that Stormgren could scarcely hear him. "We have had our failures."

"And what do you do then?"

"We wait—and try again."

There was a pause lasting perhaps ten seconds. When Karellen spoke again, his words were muffled and so unexpected that for a moment Stormgren did not react.

"Good-by, Rikki!"
